

MISSION AND OBJECTIVES.

Our mission is to inform and provide professional consulting, engineering and commercial training services. We do this in person, or using online media.

Our objective is to assist private and public institutions, as well as, all professionals, technicians, and students that may require the following services and products:

- Electrical power engineering consulting.
- Software for designing overhead and underground transmission lines for HV, MV, and LV electrical power.
- Urban and rural electrification projects.
- Renewable and conventional sources of energy
- Energy efficiency.
- LED lighting.
- Smart electrical power grids.
- Telecommunications networks, wireless and non-wireless.
- Applied electronics.
- Information about nuclear fusion.
- Professional updating seminars, webinars, for engineers and technicians.
